

## Our training centre is investing

Southern Cranes and Access always keeps up to date with the machinery used on its training courses.

Our training centre partner Accredited Plant Training has recently invested over £150,000 in new plant and facilities for the CPCS test sites.

The new machines include:

- Hitachi Zaxis 13 tonne excavator
- Hitachi Zaxis 3.5 tonne excavator
- Thwaites 3 tonne swivel forward tipping dumper
- Ammann ride on roller
- Merlo 13 metre telescopic forklift

We are confident that these new machines will further enhance the standard of teaching we are able to provide.

If you would like to know more about the training courses we provide, call Andrew Packham at Southern Cranes and Access:
